SUMMARY

Computer engineer with more than two years of experience in full-stack development and database administration. I work with Java/J2EE (Spring Boot), C#/ASP.NET Core and Python on the back-end and Angular and React.js on the front-end, over SQL Server and Oracle, covering both the design of secure REST APIs and the optimization, high availability and recovery of production databases. Experience with Docker, CI/CD pipelines and deployment on Azure and Google Cloud Platform.

EDUCATION

Master's in Computer Engineering Universidad Pablo de Olavide, Seville, Spain	2025-2027	Bachelor's in Computer Science and Mathematics Faculty of Sciences, Abdelmalek Essaâdi University, Tetouan, Morocco	2019-2022
Master's in Computer Engineering Faculty of Sciences, Abdelmalek Essaâdi University, Tetouan, Morocco	2022-2024	Baccalaureate, Physical and Chemical Sciences track Abdelmoumen Al Mouahidi High School, Tangier, Morocco	2019

PROFESSIONAL EXPERIENCE

IT Specialist — Full-Stack Developer & Database Engineer | February 2025 - Present

DSL MAROC SARL — Tangier, Morocco

- Build and maintain scalable full-stack web applications with Java, Spring Boot, JPA/Hibernate and C#/ASP.NET Core, backed by PostgreSQL, SQL Server and Oracle, along with responsive interfaces in Vue.js, Tailwind CSS, Angular and React.js.
- Design, integrate and maintain secure REST APIs with JWT and role-based access control, documented with Swagger and tested with Postman.
- Administer and tune production databases: SQL queries, indexing, execution plans, backups, recovery, Flyway migrations and monitoring with Oracle Enterprise Manager (OEM).
- Containerize applications with Docker and automate delivery through CI/CD pipelines with GitHub Actions and GitLab CI.
- Deploy and manage application resources on Microsoft Azure and Google Cloud Platform.
- Contribute to technical and architectural decisions and to ongoing code quality: code reviews, unit tests and Clean Architecture.

Software Engineer - Full Stack | November 2024 - January 2025

Enersoft — Tangier, Morocco

- Developed and maintained an electric vehicle charging web application, used by operators across several stations.
- Built microservices and secure APIs with ASP.NET Core following Clean Architecture principles.
- Designed responsive and intuitive interfaces with Angular and Bootstrap.
- Optimized database performance on MySQL, SQL Server and PostgreSQL.
- Implemented CI/CD pipelines with Docker, reducing deployment time and eliminating manual steps.

Full-Stack Developer | Internship | February - August 2024

TE Connectivity — Tangier, Morocco

- Developed an internal idea management application to review and approve employee proposals.
- Designed secure APIs and web applications with ASP.NET Core.
- Built responsive front-end interfaces with Angular and Bootstrap.
- Managed and optimized databases (SQL Server, PostgreSQL).
- Configured IIS and packaged the application in Docker containers for deployment.

PERSONAL PROJECTS

Training Center Management Platform

Full-stack web application for managing students, trainers, enrollments and courses. Secure REST APIs designed with Java, Spring Boot, JWT and MongoDB, documented with Swagger and integrated into a responsive Angular interface. Tested with Postman and containerized with Docker.

Oracle Monitoring & Alerting Stack

Self-hosted observability platform for Oracle and PostgreSQL. Custom Python exporters feeding Prometheus, with Grafana dashboards for wait events, tablespace growth, session activity and the most resource-intensive SQL queries. Automated alerts for blocking sessions and tablespace usage thresholds. Deployed with Docker.

TECHNICAL SKILLS

- **Programming languages:** Java, J2EE, C#, VB.NET, SQL (PL/SQL, T-SQL), Python, Kotlin, Scala, C, C++, PHP, R, MATLAB
- **Back-end:** Spring Boot, Spring Security, Hibernate/JPA, REST API development, JWT, ASP.NET Core, Entity Framework Core, LINQ, Node.js, Laravel, Django, Flask, FastAPI, Flyway migrations
- **Front-end:** HTML5/CSS3, JavaScript (ES6+), TypeScript, Vue.js, Tailwind CSS, Responsive Web Design, Angular, Angular Material, PrimeNG, RxJS, React.js, Next.js, jQuery, Bootstrap, Vite
- **Databases:** Oracle Database, SQL Server, PostgreSQL, MySQL, MongoDB, SQLite, Firebase
- **Testing & quality:** JUnit, Mockito, Clean Code, Clean Architecture, Agile/Scrum
- **Monitoring:** Oracle Enterprise Manager (OEM), Grafana, Prometheus
- **Cloud & DevOps:** Microsoft Azure, Azure DevOps, Google Cloud Platform, Docker, IIS, Postman, Swagger, Git, CI/CD (GitHub Actions, GitLab CI)
- **Systems:** Unix/Linux, Windows Server, Bash, PowerShell
- **Networks & security:** OSI model, TCP/IP, routing, secure network design, GNS3

LANGUAGES

- **Arabic:** Native
- **English:** Upper-Intermediate (B2)
- **Spanish:** Upper-Intermediate (B2)
- **French:** Upper-Intermediate (B2)
