

ISSAM SERBOUT

Full-Stack Developer

Java · C#/.NET · PHP · Python · Angular/React · SQL Server · Oracle · Azure

26 years old | **Tangier, Morocco** | **issam.serbout09@gmail.com**

+212 7 62 20 64 38 | **ISSAM SERBOUT** | **issamserbout**

PROFILE

Full-stack developer with over two years of experience building web applications and running the databases behind them. On the back end I work with C# (ASP.NET Core), Java (Spring Boot, J2EE), PHP (Laravel) and Python, depending on what the project needs; on the front end with Angular, React and Vue.js. I've designed and tuned SQL Server, Oracle and PostgreSQL databases in production, including backups, migrations and recovery. Recently I've also worked on AI and data: an internal LLM assistant, machine learning models for predictive maintenance, and Power BI dashboards. I ship with Docker and CI/CD on Azure and Google Cloud.

EDUCATION

Master's in Computer Engineering — **2025-2027**
Universidad Pablo de Olavide, Seville, Spain

Master's in Computer Engineering — **2022-2024**
Faculty of Sciences, Abdelmalek Essaâdi University, Tetouan, Morocco

Bachelor's in Computer Science and Mathematics — **2019-2022**
Faculty of Sciences, Abdelmalek Essaâdi University, Tetouan, Morocco

Baccalaureate, Physical and Chemical Sciences track — **2019**
Abdelmoumen Al Mouahidi High School, Tangier, Morocco

PROFESSIONAL EXPERIENCE

IT Engineer – Full-Stack Developer & Database Engineer | February 2025 – Present

DLS MAROC SARL – Tangier, Morocco

- Met with users to gather requirements, then designed the applications and databases (BPMN, UML, Merise)
- Built web apps in Java (Spring Boot, Spring Security, JPA/Hibernate, J2EE), C# (ASP.NET Core), PHP (Laravel) and Python, with Angular, React and Vue.js front ends and secured REST APIs (JWT)
- Looked after Oracle, PostgreSQL and SQL Server: tuning, backups, restores, migrations and monitoring with OEM
- Built data analysis apps and AI models in Python and R, and automated recurring reports
- Deployed with Docker and CI/CD pipelines on Azure and Google Cloud
- Applied OWASP practices, supported users, fixed incidents and kept the documentation up to date

Full-Stack and Database Engineer, AI (Internship) | February 2026 – September 2026

KESSEL – Tangier, Morocco

- Built web and mobile apps and REST APIs with Java/Spring Boot, J2EE, React and Flutter
- Designed and tuned PostgreSQL, SQL Server and Oracle databases: data modeling, indexing and queries
- SmartDesk AI: an internal LLM-based assistant that also analyzes business data in Python (Pandas)
- Secured the apps with JWT authentication, role management and encryption of sensitive data
- Deployed with Docker and CI/CD, set up server networking and supported users

Data Science & Cybersecurity Engineer (Internship) | July 2025 – January 2026

Chantiers et Ateliers du Nord (CAN) – Tangier, Morocco

- Collected and cleaned production and maintenance data and analyzed it in Python (Pandas, NumPy) and R
- Built Machine Learning models (Scikit-learn) to detect anomalies and predict equipment maintenance needs
- Created KPI dashboards in Power BI
- Analyzed system and network logs to spot suspicious behavior and intrusion attempts
- Ran vulnerability scans with Nmap, analyzed network traffic with Wireshark and proposed fixes
- Put security practices in place: access management, backups and user awareness training

Full-Stack Software Engineer | November 2024 – January 2025

Enersoft – Tangier, Morocco

- Developed a web and mobile app for managing EV charging stations, used across several sites
- Designed microservices and secured APIs in ASP.NET Core following Clean Architecture
- Built responsive interfaces with Angular and Bootstrap
- Tuned MySQL, SQL Server and PostgreSQL databases to make the app faster
- Automated production releases with Docker and CI/CD, which cut deployment time

Full-Stack Developer (Internship) | February – August 2024

TE Connectivity – Tangier, Morocco

- Developed an internal app where employees submit ideas and managers review and approve them
- Designed secured APIs and web apps with ASP.NET Core
- Built the front end with Angular and Bootstrap
- Managed and tuned SQL Server and PostgreSQL databases
- Deployed on IIS and containerized with Docker

PERSONAL PROJECTS

- **AI medical assistant :** A chatbot web app. The user sends a question or a photo (a symptom, a skin lesion, a prescription) and the AI explains the possible causes, rates how serious it looks and tells the user to see a doctor when needed. It only answers medical questions. It uses a language model through an API and an image analysis module, and keeps each user's conversation history. Security: JWT authentication, encrypted patient data, filtering of off-topic questions and protection against prompt injection.
  Tech: Python, FastAPI, React, PostgreSQL, OpenAI / Gemini API, JWT

- **Bank fraud detection :** Analysis of a transaction dataset with Pandas (cleaning, handling missing values, feature engineering), with SMOTE to deal with class imbalance. I trained and compared Logistic Regression, Random Forest and XGBoost, measured by precision, recall and F1-score, to catch fraudulent transactions. Results and risk indicators are shown in a Power BI dashboard.
  Tech: Python, Pandas, scikit-learn, XGBoost, Power BI

- **Network monitoring tool :** A web app that finds devices on the network automatically (ping, SNMP), tracks their status live and sends an email or notification when one goes down or disconnects. A dashboard shows device uptime and incident history.
  Tech: Spring Boot, Vue.js, MySQL, SNMP

TECHNICAL SKILLS

- **Programming languages :** Java, C#, VB.NET, Python, PHP, JavaScript (ES6+), TypeScript, SQL (PL/SQL, T-SQL), Kotlin, Scala, C, C++, R, MATLAB
- **Back-end :** Spring Boot, Spring Security, Hibernate/JPA, J2EE, ASP.NET Core, Entity Framework Core, LINQ, Laravel, Django, Flask, FastAPI, Node.js (Express), REST APIs, JWT, Flyway
- **Front-end :** Angular, Angular Material, PrimeNG, RxJS, React.js, Next.js, Vue.js, HTML5/CSS3, Bootstrap, Tailwind CSS, jQuery, Vite, responsive design
- **Databases :** Oracle, SQL Server, PostgreSQL, MySQL, MongoDB, SQLite, Firebase (tuning, migration, backup/restore)
- **Data Science & AI :** Machine Learning, Deep Learning, NLP, LLMs (OpenAI / Gemini API), Prompt Engineering, Pandas, NumPy, scikit-learn, XGBoost, TensorFlow, Matplotlib, Jupyter, Power BI, web scraping
- **Cybersecurity :** OWASP Top 10, vulnerability analysis, log analysis, intrusion detection, Nmap, Wireshark, encryption, RBAC, MFA, disaster recovery planning (DRP), ISO 27001
- **DevOps & Cloud :** Docker, Git, CI/CD (GitHub Actions, GitLab CI), Azure, Azure DevOps, Google Cloud, IIS, VMware
- **Systems & networks :** Linux/Unix, Windows Server, Active Directory, Bash, PowerShell, OSI model, TCP/IP, routing, DNS, DHCP, VPN, VLAN, SNMP, secure network design
- **Monitoring & support :** Grafana, Prometheus, Zabbix, Oracle Enterprise Manager (OEM), GLPI, ITIL
- **Testing & quality :** JUnit, Mockito, Postman, Swagger, Clean Code, Clean Architecture
- **Analysis & methods :** Merise, UML, BPMN, functional specifications, Agile/Scrum, V-model
